**Join the Role Play on protecting marine biodiversity -
Make a planned MPA work!**

Monica Facci, *Mundus maris* asbl, Belgium

YouMaRes, Hamburg, 15 - 17 May 2024 – Ocean Forum

The framework

We are witnessing what scientists have called the **Sixth Mass Extinction**.

Biodiversity assures the functioning of ecosystems and their services.
We depend on biodiversity!

The **Kunming-Montreal Global Biodiversity Framework**, adopted at the 15th Conference of Parties in 2022.

23 specific targets grouped under 4 global goals.

Benefits will be reached if this global agreement will be implemented in locally and regionally ways.

Our mission

We want to make something abstract become realistic. A change from the bottom, not only directives from the top.

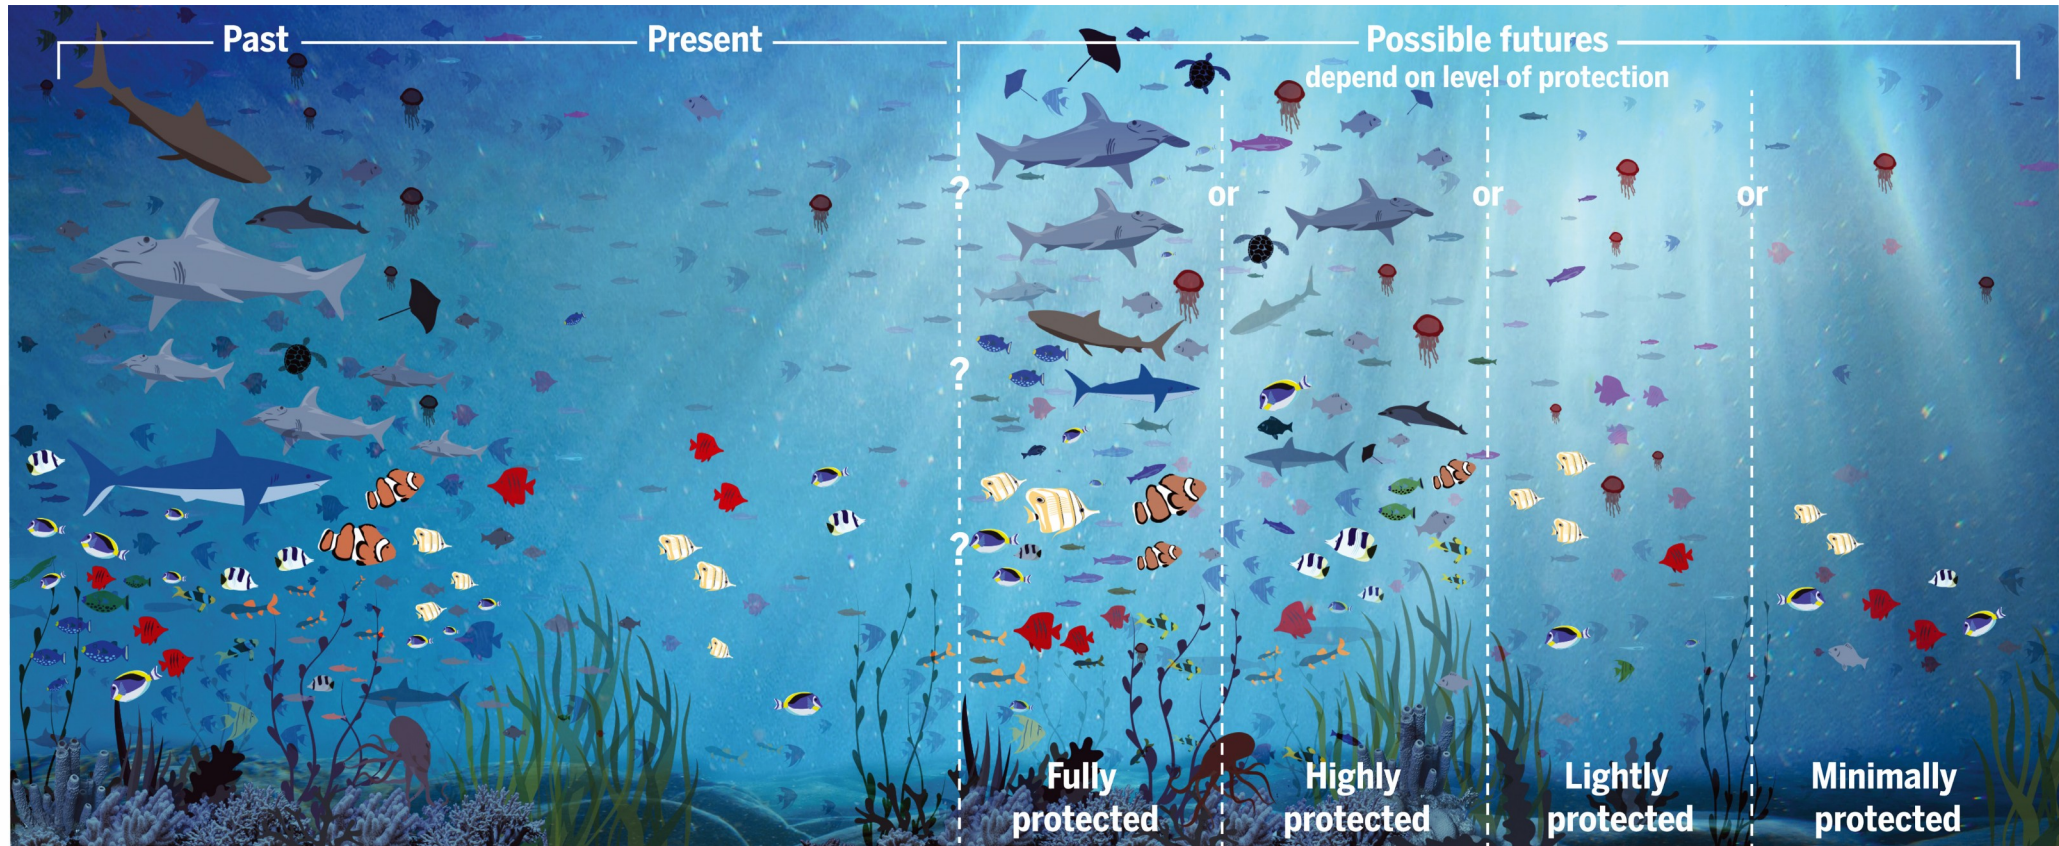

We want you to engage in the conversation about the global biodiversity crisis we are living.

We encourage consensus through collaboration.

Marine Protected Areas:

Geographically distinct zones which aim at safeguarding the biodiversity through habitat protection.

Fundamental for release pressure on habitat and species.

The stakeholders

Who needs to be there?:

- 1) The artisanal fisher
- 2) The natural scientist
- 3) The MPA Director
- 4) The marine conservationist from an NGO
- 5) The representative of a public authority

Additional profiles:

- 6) The tourism manager
- 7) The head of a municipal sewage plant
- 8) The owner of a company interested in the building of an offshore wind farm
- 9) The captain of an industrial fishing company
- 10) The artisanal fisher woman
- 11) The social scientist

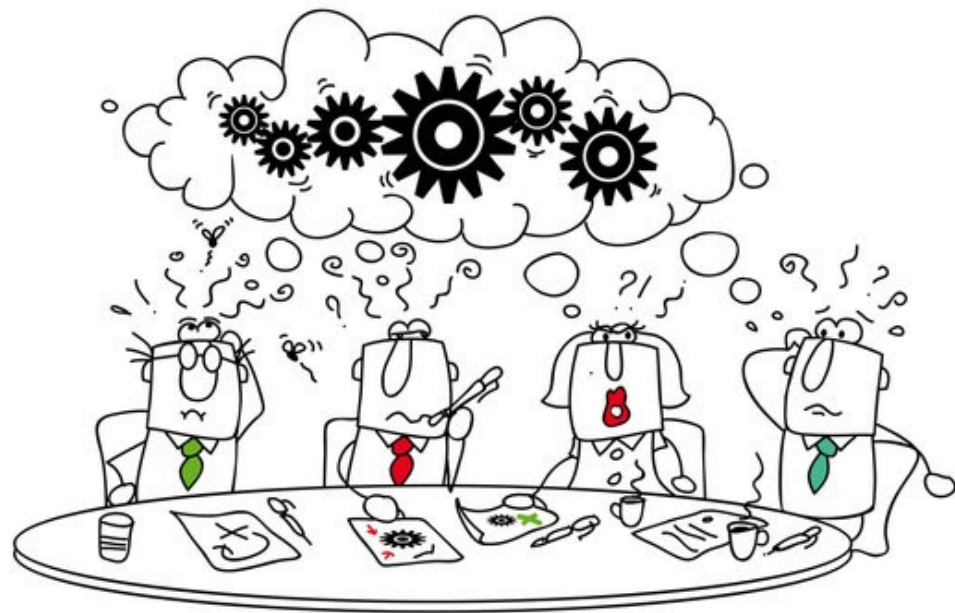

The deliberation

We invite you to join the debate!

You can choose what character you want to play.

Information sheets about the different profiles will be provided, but we want you to also bring your knowledge.

The debriefing

A moment to digest and reflect
on the dynamics that took place.

The real learning process.

Let feelings and issues emerge.

Suggestions will be welcomed!

Thanks for your attention
